PROFILE SUMMARY

Data Analytics intern candidate experienced in Excel, SQL with working knowledge of Python and Power BI, passionate about converting raw data into clear business insights.

PROFESSIONAL EXPERIENCE

Data Annotator

Label My Data – Dhaka

2024 – 2025

- Annotated and validated large datasets (images, text, sensor data) for computer vision and NLP models, consistently exceeding accuracy targets above 95%.
- Implemented quality assurance checks that reduced annotation errors by 20%, improving data quality for downstream machine learning models.
- Collaborated with engineering teams to refine data preprocessing and annotation protocols, ensuring datasets were clean, structured, and analysis-ready.
- Gained exposure to AI/ML workflows, dataset preparation, and data quality control.

Data Entry Assistant

TechTroiz Solution – Dhaka

2022 – 2023

- Cleaned, structured, and uploaded large datasets into internal databases using Excel and web-based tools, improving reporting speed by 30%.
- Ensured data integrity by cross-referencing information from spreadsheets, databases, and source documents, maintaining 99% accuracy.
- Assisted analytics team by preparing Excel reports and summaries, supporting decision-making processes.
- Developed strong experience in data validation, data cleaning, and reporting automation.

PROJECTS

- Road Accident Analysis Dashboard (Excel)** – Built an interactive dashboard analyzing 250k+ records to identify high-risk accident zones and visualize trends by time, location, and severity.
[GitHub: Road Accident Analysis](#)
- Indian General Elections 2024 (PostgreSQL)** – Designed a database covering 543 constituencies; executed complex queries on demographics, turnout, and party performance.
[GitHub: Indian General Elections 2024](#)
- E-Commerce Bookstore (PostgreSQL)** – Developed a relational database for sales, customer, and inventory management; applied queries for actionable business insights.
